PROFESSIONAL SUMMARY

MCA candidate specializing in Cloud Computing with practical experience developing web, mobile, database, and serverless applications using Java, ASP.NET Core, JavaScript, SQL, and AWS. Built academic projects including a student study planner, campus lost-and-found portal, blood bank platform, and automated image-resizing workflow. Strong foundation in data structures, OOP, DBMS, computer networks, IAM, and cloud architecture, with exposure to AWS and GCP. Detail-oriented problem solver seeking an entry-level cloud or software development role to build secure, reliable solutions.

EDUCATION

Master of Computer Applications (MCA) - Cloud Computing **2025-2027 (Pursuing)**
Parul University, Vadodara, Gujarat

Bachelor of Computer Applications (BCA) **2022-2025**
Patliputra University, Patna, Bihar

TECHNICAL SKILLS

Languages: Java, C#, JavaScript, PHP, SQL, C

Web & Backend: HTML, CSS, React, Node.js, Express.js, ASP.NET Core MVC

Mobile & Databases: Android (Java/XML), SQLite, MySQL, MongoDB, SQL Server

Cloud & Tools: AWS Lambda, Amazon S3, AWS IAM, Google Cloud Platform (GCP), Git, GitHub, VS Code, Android Studio

Core Knowledge: Data Structures & Algorithms, OOP, DBMS, Cloud Computing, Computer Networks

PROJECTS

StudyFlow - Student Study Planner (Tiny Project) | *Java, XML, SQLiteOpenHelper, RecyclerView, AlarmManager*

- Built an offline multi-user Android planner with PBKDF2-based login and user-scoped SQLite data for secure account separation.
- Implemented subject, task and exam CRUD, task filtering, progress tracking, calendar indicators, reminders, Android notifications, and an offline in-app assistant.

Campus Lost & Found (Tiny Project) | *ASP.NET Core MVC, C#, EF Core, SQL Server, Bootstrap*

- Developed a role-based campus portal where students can report lost or found items, upload images, search and filter posts, mark items resolved, and manage records through an admin dashboard.
- Built a responsive Bootstrap interface and used EF Core with SQL Server for structured CRUD operations, item-status updates, and record management.

LifeDrop - Blood Bank Management System | *MongoDB, Express.js, React, Node.js*

- Developed a MERN platform that connects patients with eligible blood donors through blood requests and smart matching.
- Added email alerts, admin verification, donation camps, password reset, and patient document proof verification.

Serverless Image Resizer (Tiny Project) | *HTML, CSS, AWS Lambda, Amazon S3, AWS IAM*

- Created an event-driven workflow that uses AWS Lambda to resize images uploaded to Amazon S3 automatically.
- Applied secure S3 storage and least-privilege IAM permissions for controlled service-to-service access.

CERTIFICATIONS

- **AWS Solutions Architect_FSP** - FutureSkills Prime / NASSCOM **| Gold - 97%** | Jul 2026
- **Computer Network and Internet Protocol** - NPTEL | Elite - 60% | 2026
- **Java Training** - EduPyramids, SINE, IIT Bombay | 2026
- **Python for Data Science** - IBM | 2025
- **Introduction to SQL** - Simplilearn | 2025
- **Introduction to PHP** - Simplilearn | 2025
